SUMMARY

An Interaction Design student driven by curiosity and a passion for creating meaningful experiences. I enjoy exploring how people connect with the world and turning those insights into thoughtful design solutions. To me, design is a way of telling stories shaped by curiosity and lived experience, and every project I take on becomes a chance to explore, learn, and express ideas through visuals, interactions, and emotion. I am especially drawn to opportunities in UI/UX, creating multisensory experiences and Game Design, where creativity and interactivity come together to shape immersive design.

SKILLS

UI/UX & Interaction Design: Figma, Wireframing, Prototyping, Interaction Design, UX Design, Spatial UI/UX, User Flows, Interface & Dashboard Design, Visual Design, Information Architecture

Visual, 3D & Immersive Design: Photoshop, Illustrator, After Effects, Blender, Unity, Product Design, Game Design, Multisensory & Immersive Experiences

Process & Collaboration: Applied UX Principles, Iterative Prototyping, Cross Functional Collaboration, Startup / Web3 Product Design, Event & Logistics Coordination

EXPERIENCE

UI/UX Designer, Calip.io

[June 2026 to July 2026]

- Designed interface screens and wireframed user flows for a Web3 startup investment platform, translating product requirements into clear layouts.
- Built screens in Figma across startup discovery, analytics, dashboards, and portfolio interactions.
- Applied UX principles to deliver intuitive, consistent experiences across the platform.

Member, Anant Student Council, Anant National University

[December 2024 to September 2025]

- Coordinated event planning, vendor logistics, and backstage operations to ensure seamless execution of institute events.
- Managed logistics and on the day execution for multiple institute events, including Ganesh Chaturthi, Convocation 2024, WinterIsCool, and Navaratri.
- Contributed to cultural engagement and event management across the university calendar.

PROJECTS

Hospital Bed Redesign for Safe Patient Transfer

- Led a redesign focused on safety, improving patient transfer between stretcher and bed, focused on reducing physical strain on staff and improving patient comfort and safety.
- Patent filed with SSIP (Student Startup & Innovation Policy); MoU signed with Anant National University.

Data Extraction & Visualization Workflow

- Built an end-to-end data visualization framework, guiding the pipeline from raw data extraction to segregation and Visual presentation.

Urban Water & Drainage Systems Analysis | Group Project

- Executed a systems design analysis of city water pipelines and drainage networks to identify underlying system traps and operational bottlenecks.
- Mapped Visible and Invisible stakeholders and visual ecosystem flows to synthesize complex environmental dynamics into actionable design insights.

EDUCATION

Bachelor of Design, Anant National University, Ahmedabad *Expected 2027*

- Major in Interaction Design; Minor in Product Design.

ADDITIONAL

Languages: English, Hindi, French

Honours: Patent filed with SSIP; MoU signed with Anant National University.
